

MACS Energy & Water is an independent consulting company active in the field of sustainable infrastructure development and finance. In our focus we have the changing realities in the energy and water supply sectors and challenges which these changes bring along. Our business model is based on the holistic thinking, which is needed to get sustainable energy and water projects off the ground. Our regional experience primarily covers Central and South East Europe, Latin America, Central Asia, Middle East, North & Sub-Saharan Africa, as well the EU countries. We currently have the following job opening:

**Engineer for Energy Efficiency and Renewable Energy (EE/RE)
(Associate position)**

The Position of Associate Engineer is based in our Belgrade office. As an associate you will be challenged to develop firsthand knowledge of our client's business models, building up client-management, problem-solving and communication skills. An associate contributes significant segments to our total services as well as develops responsibility for supporting the broader problem-solving effort. The findings and contributions to team discussions will help to deliver impact for clients.

The position covers the following working areas:

- Research and analysis of energy systems, especially in the field of EE, RE and resource efficiency
- Assistance for development and implementation of strategies for EE/RE finance instruments
- Support in implementation activities of EE/RE financial instruments
- Execution and validation of energy audits, technical due diligence, project implementation monitoring
- Support to project management in the above-mentioned working areas

Requirements:

- Engineering university degree with specific knowledge of EE technologies and the use of RES (electrical/mechanical/architecture)
- Min. of two years job experience (foreign working experience is an asset)
- Excellent language, drafting, communication and presentation skills in English, additional knowledge of other languages are assets
- Flexibility to travel on short notice (approximate traveling time up to 20%)

Rewards:

- Clear career path
- Interdisciplinary international expert teams
- Well known international clients and partners
- Exploring different cultures and environments
