CONFERENCE OBJECTIVES

The main aim of this year's conference is to offer a scientific and professional contribution to development of engineering profession within entrepreneurship and management with a special accent on sustainable development. A comprehensive and multidisciplinary overview of up-to-date issues regarding circular economy as a conceptual framework of sustainable development is necessary for development of new products and services along with continuous rational use of natural resources. Having in mind that circular economy may be a solution to growing needs of humanity in the light of natural restrictions of our planet, the organizers of this conference have agreed about the topic of the conference: "CIRCULAR ECONOMY – AN OPPORTUNITY FOR A SUSTAINABLE DEVELOPMENT" with the idea to gather all those who can considerably contribute to this topic: scientists, professionals, business people and all others.
