

**Nu Energy and Investment** is a regional energy company operating in the energy sector with a wide range of services, from engineering, procurement, and construction (EPC) to electricity trading.

The vision of our company is to be a strong player in the field of sustainable energy, offering clients reliable, highly efficient, and environmentally friendly energy projects with innovative solutions.

Our main product portfolio includes electricity generation and trading, with a special focus on renewable energy sources (RES).

We are looking for a **Junior Power Trader**

Location: Podgorica

#### **Key Responsibilities:**

- Independently performing electricity trading activities in the Balkan markets - ME, SRB, HR, SI, RO, BG, GR, HU
- Developing and implementing Day Ahead vs Intra Day vs Balancing Market strategies
- Initiating the development and execution of algorithmic trading and automation
- Conducting market analysis to identify new business opportunities and building strategies to capitalize on them
- Monitoring and managing risks associated with trading activities
- Close cooperation with other teams within the organization, including finance, legal, risk, and back office.

#### **Requirements:**

- Completed degree from the Faculty of Electrical Engineering or Economics
- Advanced knowledge of the English language
- Responsible approach to tasks
- Strong analytical skills and decision-making ability in a proactive environment
- Positive attitude and a team player
- Good verbal communication skills
- Accuracy and precision

#### **Desirable, but not mandatory:**

- Two years of experience in electricity trading in SEE markets

- Experience with algorithmic trading and quantitative methods such as modeling with Python.

**We offer:**

- Competitive base salary
- Performance-based rewards in line with company policy
- Opportunity to work with international markets
- Friendly and goal-oriented work environment
